

ASIA SVARNOI

[B2BSVARNOI.KZ](https://b2bsvarnoi.kz)

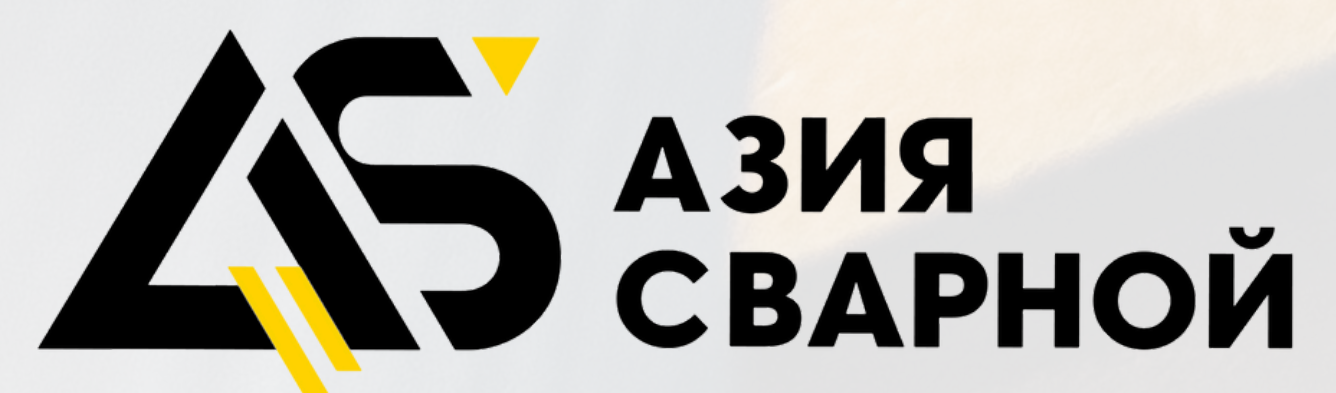

ABOUT ASIA SVARNOY

We are proud to hold the status of an official dealer for the world's leading manufacturers of welding equipment, Aotai and Grovers. Aotai equipment is known for its innovative technologies, while Grovers' machinery has earned recognition for its multifunctionality and durability. Furthermore, we are the exclusive supplier of products from the leading Indian electrode manufacturer Superon, special materials from Castolin, and North welding torches.

Along with equipment from global leaders, "Asia Svarnoy" offers a cost-effective and high-quality solution under its own brand. Our "Zhuldyz" welding wire and electrodes have already established themselves in the market as a reliable product that delivers professional results at an optimal cost.

"Asia Svarnoy" is a major supplier of professional solutions for welding and cutting in the Kazakhstan market. We offer our clients advanced equipment and high-quality consumables, providing a solid foundation for the implementation of projects of any complexity.

WHY YOU CAN TRUST US

Expertise

Professional consultations and equipment selection tailored to the client's tasks.

Assortment and Direct Supplies

A wide selection of over 1,500 product items.
Guarantee of the best prices and quality from leading manufacturers.

Our own production

High-quality consumables under our own brand, offering excellent performance at a competitive price.

Exclusive Services

Professional consultations and equipment selection for the client's needs. Custom supply of welding robots and CNC laser machines.

A Full Range of Equipment and Materials for

- construction of oil and gas facilities
- production of metal products and structures
- mechanical engineering and production of specialized equipment
- repair and service industries

Make Better

CNC LASER MACHINES

Modern CNC machines are a strategic asset for today's manufacturing, significantly boosting its competitive edge. "Asia Svarnoy" provides services for the selection and delivery of high-tech equipment specifically tailored to your production needs.

Advantages of CNC Machines

The laser beam ensures micron-level cutting precision, creating intricately shaped parts with perfectly smooth edges that require no additional finishing. These machines operate at high speeds, which substantially reduces the production cycle time compared to traditional cutting methods.

Laser machines can process an extensive range of materials: from metals and plastics to wood, fabric, leather, and glass. This makes them a profitable investment, as a single machine can handle tasks for various production needs.

The cost of production is reduced thanks to high speed, precision, and minimal waste (due to the thin kerf). Furthermore, the non-contact processing method eliminates wear and tear on cutting tools, lowering maintenance expenses.

Software control (CNC) allows for rapid machine reconfiguration. This enables a prompt response to changes in market demand.

Stages of Cooperation

- request and consultation
- customized solution selection
- detailed commercial proposal
- turnkey delivery
- commissioning and training

AOTAI

Innovation and Power for Industry - key solutions from Aotai for your business. "Asia Svarnoi" proudly presents technologies that are redefining industry standards and becoming the foundation of efficiency for leading industrial enterprises.

Units for manual metal arc welding (MMA)

A stable arc, reliable performance with various types of electrodes, and built-in protection systems make Aotai's MMA units a workhorse tool that will never let you down.

Inverters for semi-automatic welding (MIG/MAG)

The ideal solution for metal fabrication and mechanical engineering. It ensures high welding speed, a stable arc, and deep penetration. Intelligent control systems allow for the precise adjustment of parameters for working with metals of varying thicknesses, from carbon steel to aluminum alloys.

Units for tungsten inert gas welding (TIG)

Impeccable precision for critical joints. A wide range of settings and arc stability at low currents.

WELDING ROBOTS

Aotai robotic systems are your step into the future of industrial manufacturing. They deliver phenomenal speed, 24/7 quality consistency, and 100% repeatability of complex welds. Implementing a robot can multiply productivity, minimize the human factor, and reduce production costs, which is especially critical in serial production. As an official dealer of Aotai, we carry out welding robotization projects: from expert consultation to the supply and commissioning of the system.

Key Features

- high positioning accuracy (± 0.05 mm)
- simple programming and intuitive interface
- full integration with Aotai welding power sources

GROVERS

The key distinguishing feature of Grovers machines is their bright digital LED screens and intuitive controls. Precise adjustment of all welding parameters is now simpler and clearer than ever. The new interface allows welders of any skill level to instantly set the required values and maintain full control over the process, which directly impacts work speed and quality consistency.

Advantages of the new Grovers line

- reduced setup time
- easy to use, so any employee can master the machine quickly
- visual control prevents incorrect settings
- consistently high weld quality thanks to precise adjustment

SOLUTIONS FOR ANY TASK

At "Asia Svarnoi," we understand that for construction companies, repair shops, and manufacturing facilities, the key factors are reliability, productivity, and equipment standardization. That's why we offer a full range of Grovers machines, perfectly suited for bulk purchases and for outfitting entire teams and work sites.

Here, you can purchase both the new generation of machines and the time-tested Grovers industrial line. These are indestructible, simple, and exceptionally reliable units that have proven their effectiveness in the harshest conditions of construction sites and repair zones.

Everything for professional welding from Grovers

- units for manual metal arc welding (MMA)
- inverters for semi-automatic welding (MIG/MAG)
- units for tungsten inert gas welding (TIG)
- air plasma cutting (CUT)
- welding torches
- welding helmets

OUR WELDING WIRE

Welding wire from "Asia Svarnoi" is quality you can trust. Introducing "Zhuldyz" - our signature welding wire that meets the highest standards and has already earned the recognition of welders across various industries. It is chosen for its stable arc and excellent weld quality, confirmed by positive feedback from professionals.

"Zhuldyz" is available in the most popular diameters: 0.8 mm and 1.2 mm. We also stock branded ER70S-6 wire from another supplier, available in a full range of sizes: 0.8, 1.0, 1.2, and 1.6 mm.

Advantages of welding wire from Asia Svarnoi

- efficiency: the virtual absence of spatter reduces cleanup time and saves your resources
- cost-effectiveness: we guarantee the best price-to-quality ratio on the market, making your production more profitable

OUR ELECTRODES

Through our exclusive partnership with Stellaris, a leading manufacturer in India, we present our signature line of welding electrodes. Products under our brand represent guaranteed world-class quality, produced at one of the most modern plants and adapted to the needs of our clients.

E6013 Electrodes (Rutile)

The ideal choice for manual arc welding in household applications, repairs, and structural assembly. Easy initial and repeat arc striking, a stable burning arc, and minimal spatter make them an indispensable tool for any welder.

E7018-1H4R Electrodes (Basic, Low-Hydrogen)

Low hydrogen content (H4) and moisture resistance (R) guarantee a ductile, tough, and crack-resistant weld with high mechanical properties. This is the standard for welding load-bearing elements, pressure vessels, and other critical structures.

E309L-16 Electrodes for Stainless Steel (NJ Type)

This series is designed for working with corrosion-resistant chromium-nickel steels.

OUR ELECTRODES

"Asia Svarnoi" is the exclusive partner of the leading Indian electrode manufacturer, SUPERON, in Kazakhstan. We provide direct access to advanced welding consumables recognized by professionals worldwide. We understand how crucial uninterrupted operation is for your production, which is why we maintain a large and constant warehouse stock of the most in-demand electrode brands. Our direct partnership guarantees authentic products and the best possible pricing for our customers.

Always in stock at our warehouse

- universal E6013 electrodes
- E7018 electrodes for critical structures
- E308L, E309L, E316L electrodes for stainless steels
- SUPERHARD electrodes for hardfacing
- SUPERCAST electrodes for welding and repair of cast iron products

CASTOLIN

"Asia Svarnoi" is the exclusive supplier of products from Castolin, a leading global manufacturer of materials and equipment for the repair, hardfacing, and protection of metal surfaces. Our assortment features a wide range of Castolin products, including electrodes, hardfacing powders, wires, and specialized materials for the repair and restoration of industrial equipment parts.

Castolin materials help to extend the service life of equipment, reduce wear on parts, and cut maintenance and repair costs.

Castolin products in stock

- EutecTrode electrodes for repair and wear protection
- Eutectic electrodes for high-quality joint welding
- Castomag welding wire
- filler rods for TIG welding
- brazing alloys
